

I support the proposed changes. The license class structure needs to have the old Novice and Advanced classes incorporated into the present structure of Technician, General, and Extra. The Morse requirement is obsolete. This proposal reasonable takes care of these issues.

However, I think the Commission should take further action. The HF bands are set up for Morse/Digital modes or voice and similar emissions. If the commission removes the requirement for Morse, then it follows that the sub-bands for use of Morse should also be either removed or made smaller. I suggest that upper limits for all HF Morse/digital mode sub-bands be moved LOWER, ie, make these sub-bands smaller, concurrently with the changes as proposed in the petition. While the petition suggests some changes in sub-bands, they are not enough if Morse is to be eliminated as a requirement.
